

Is Your Business / Multifamily Dwelling Affected?

State legislation AB 341 mandates businesses and public entities generating four (4) cubic yards or more of waste per week and multifamily residential dwellings with five (5) units or more to recycle.

All businesses and multifamily residential dwellings are encouraged to take advantage of recycling programs and select any combination of the following to divert commercial solid waste from disposal:

- Subscribe to recycling services from Burrtec
- Arrange for the pickup of recyclable materials
- Self-haul recyclables to a recycling center

It is important for business and multifamily residential dwellings to be proactive and contact their solid waste recycling service provider to ensure they are receiving the recycling services necessary to comply with AB 341.

A property owner of a commercial business or a multifamily residential dwelling may require tenants to source separate their recyclable materials to aid in compliance.

How Can Burrtec Help?

Burrtec Recycling Coordinators can assist with providing the necessary education and outreach. Contact our customer service department today to schedule a complimentary waste and recycling survey.

Scavenging Is Illegal!

Whether it's called dumpster diving or scavenging, it is the unauthorized removal of solid waste materials. Removal of materials from a bin may increase the cost of collection services. Materials placed in a recycling bin have a value that is used to offset collection and processing costs. When a scavenger breaks the law and removes those materials they are also removing any value associated with the recycling program, which ultimately affects costs. If you see a scavenger, do not approach them! Report illegal activity to local law enforcement. Also, please help us help you. Do not give permission to scavengers to take recyclables.

What Container is Best for Your Program?

We offer FREE recycling services such as:
